JAVA DEVELOPMENT

EVENT DETAILS

Date: 2026-05-14
Duration: 2:00 TO 4:00
Organized By: Computer science
Speaker: Avanti
Designation: AV HALL
Who Can Attend: All members can attend the workshop/event.

SESSION CONDUCTED BY

OBJECTIVE

Objectives of Java Workshop

- To understand the fundamentals of Java programming language.
- To learn object-oriented programming concepts in Java (Class, Object, Inheritance, Polymorphism, Abstraction, Encapsulation).
- To gain hands-on experience in writing and executing Java programs.
- To understand exception handling, arrays, strings, and collections in Java.
- To learn event handling in Java using AWT/Swing.
- To develop GUI-based applications using Java components.
- To understand file handling and database connectivity (JDBC).
- To improve problem-solving and coding skills using Java.
- To build mini Java projects for practical implementation.

If you specifically mean Java Event Handling workshop objective, then:

SUMMARY

Objective of Java Event Handling Workshop

To understand the concept of event-driven programming in Java.

To learn different event types (ActionEvent, MouseEvent, KeyEvent, WindowEvent).

To implement event listeners and event handlers.

To create interactive GUI applications using AWT/Swing.

To handle user interactions like button clicks, keyboard input, and mouse actions.
